## Installation of Fusion Series (inside + outside)

### Priming

- Prime all areas to be tiled.

### Adhesive

- Use only the correct adhesive.
- Only use adhesive that is white or off white in colour.
- Use a flexible adhesive.
- Wall application will require the use of a NON SLUMP adhesive.

### Grouting

- Use a flexible grout
- Always use a non-abrasive grout
- Carefully apply grout to grout joints only, avoid covering the tile surface with grout, due to the metallic nature of the product, this will make cleaning easier.

### Tips

- Ensure you have enough tiles of the same batch to finish your job.
- Use the same manufacturer's products throughout tiling procedures from priming to grouting.

### DISCLAIMER

The technical details, recommendations and other information contained in this data sheet are given in good faith and represent the best of our knowledge and experience at the time of printing. It is your responsibility to ensure that our products are used and handled correctly and in accordance with the applicable Australian Standard, our instructions and recommendations and only for the uses they are intended. We also reserve the right to update information without prior notice to you to reflect our ongoing research and development program.

Country specific recommendations, depending on local standards, codes of practice, building regulations or industry guidelines, may effect specific installation recommendations.

The supply of our products & services is also subject to certain terms, warranties & exclusions, which may have already been disclosed to you in prior dealings or otherwise available to you on request. You should make yourself familiar with them.
